

# U.S. Tech circulation and readership

**Newspaper Readership** Published 9 times per year, the U.S. Tech newspaper reaches professionals who design, develop, manufacture and test electronic products. This unique publication continues to thrive even as our readers' reliance upon electronic media grows.

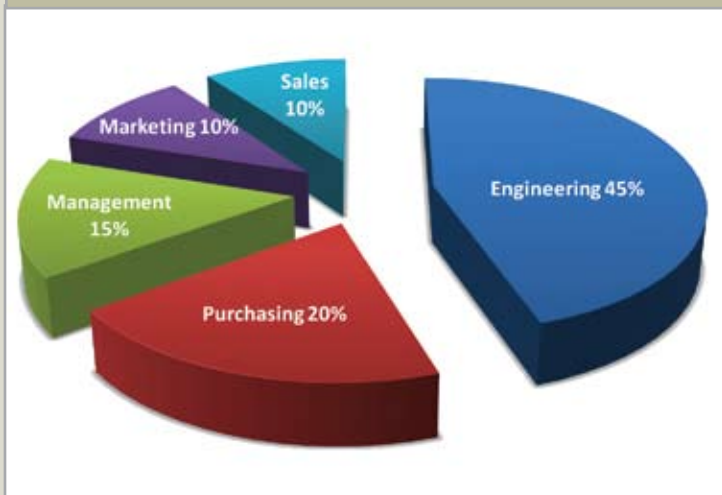

We initially developed and continue to refine the circulation of U.S. Tech by attending all

major electronics trade shows. Our circulation has grown to over 32,000 decision makers, whose purchases of electronic equipment, systems, and components total in the billions of dollars.

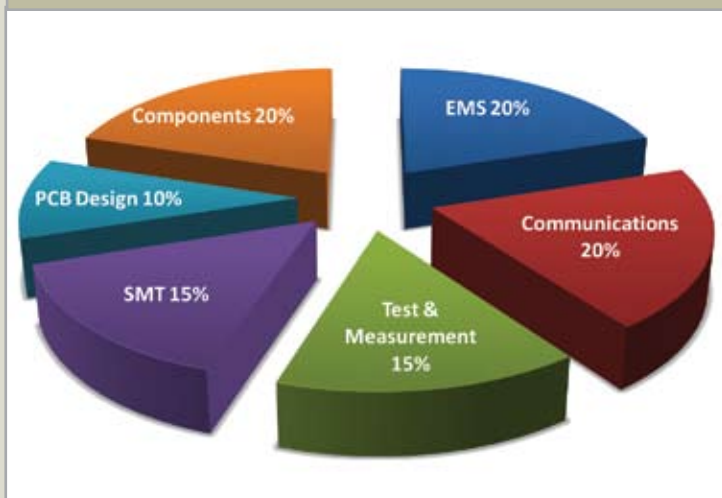

Every article and new product release found in the paper, and others submitted but not printed, are uploaded in full to both [us-tech.com](http://us-tech.com) and our Chinese site [www.us-tech.cn](http://www.us-tech.cn).
